

ISO 22000: 2018

FOOD SAFETY MANAGEMENT
SYSTEMS

INTRODUCTION

ISO 22000:2018

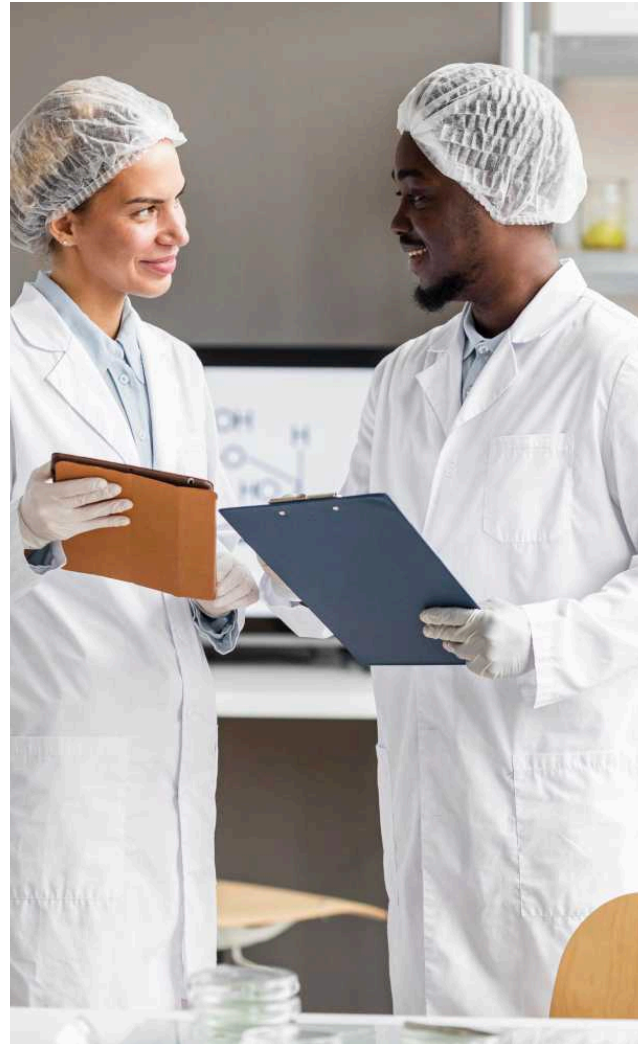

The current world food trade is valued. It embodies traceability in the food at \$300-400 billion. With the demand and food chain and also offers for food rising to meet the ever technical specifications by sector, growing world population, food safety these include farming, food is becoming more important. One of manufacturing, catering, packaging, the reasons why food safety has such and feed and animal food an important role in the production. manufacturing process is to ensure the products delivered to consumers do not interfere with a person's health.

When an organization fails to comply with food safety regulations, it can result in the transmission of food borne illness. ISO 22000 is a defined set of global standards for Food Safety Management Systems. The system is designed to enable organizations to control food safety hazards along the food chain. This is applied to all types and sizes of organization in the food chain.

Why Your Organization Should Get ISO 22000

Global food production has been confronted with some troubling results in the last decades. Foodborne illness; food contaminants, pesticide exposure, environmental effects, wrong handling and storing of the food are just some of the biggest food safety concerns.

The safety of food doesn't only have a major impact on public health, but also on international trade. Safe food handling begins at production and goes through each point of the chain up to the consumer.

Food chains are longer and more complex due to globalization of production and procurement, which directly affects the safety of food.

Importance Of ISO 22000

The purpose of ISO 22000 is to provide a practical approach to ensure the reduction and elimination of food safety risks as a means to protect consumers. ISO 22000 is intended to help organizations:

- Embed and improve the internal processes needed to provide consistently safe food.

- Provide confidence to your organization and the management team that your organization's practices and procedures are in place and that they are effective and robust.
- Provide confidence to customers and other stakeholders (through the ISO 22000 certification process) that your organization has the ability to control food safety hazards and provide safe products.
- Provide a means of continual improvement that ensures that the food safety management system is reviewed and updated so that all activities related to food safety are continually optimized and effective

Benefits Of ISO 22000

ISO 22000 will help your organization minimize any food risks and improve performance as it relates to food safety. This is achieved by providing a framework they can use to develop an efficient FSMS, a systematic approach to addressing food safety issues.

It provides improved health and safety standards, minimizes food risks, and leads to better health and safety outcomes for customers, other users, employees, and others who may come into contact with food.

Total compliance with regulatory requirements is required to achieve certification to ISO 22000. Having an FSMS in place can help companies meet these requirements and understand how they impact your organization and its customers.

Target Customers

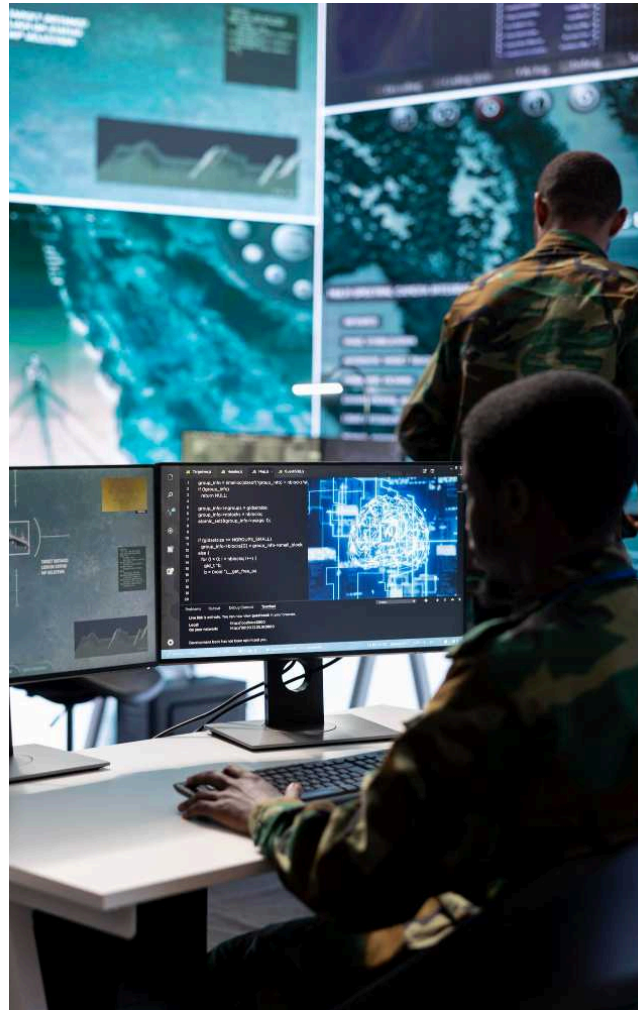

Regardless of size, from feed producers, primary producers through food manufacturers, transport and storage operators, and subcontractors to retail and food outlets; ISO 22000 certification applies to any organization within the food chain.

It may be applied to service providers and inter-related organizations such as producers of equipment, packaging material, cleaning agents, additives, and ingredients.

About DTA

Delta Tech Africa Limited Is An ICT And Quality Consulting Organization Focused On Performance Management Across Business Verticals. Delta Means“ A Finite Increment”. We Help Organizations To Achieve This Increment Across Departments And Functions And To Improve The Overall Organizational Performance While Adding Value To The Stakeholders. Evolution Is A Constant Change. When The Pace Of Evolution Renders Societies Impatient, It Is A Technology That Accelerates Evolution Leading To The Transformation Of Societies. When That Evolution Happens, It Doesn't Limit The Human Endeavors, To Get The Technology Evolution, It Has To Be Supported By Processes And Management Of The Best Quality. Hence, We At Delta Tech Africa Thought Of Bringing Both Technology And Quality Management Processes Together To Get The Best Organizational Performance And Value Across The Fast Growing Continent Of Africa.

Our Offices

Nigeria | PLOT 55B, Baderinwa Alabi Street, Central Lekki Residents' Association ,
Rahman Adeboyejo Street Lekki Phase 1, Lagos, Nigeria

Kenya | P.O.Box 39562-00623, Parklands, Nairobi, Kenya.

Ghana | Plot 3, Dade Link, Off Dade Street, Labone, Accra, Ghana.

South Africa | 1 Waterhouse Place Century City Cape Town 7441
