OCCUPATION HEALTH& SAFETY MANAGEMENT

INTRODUCTION
ISO 45001: 2018

The occupational health and safety (OH&S) management system, otherwise known as ISO 45001, is one of the new international standards that provides a standard framework for an organization to manage the various risks and opportunities to help prevent work- related injury and ill health to workers.

The intended purpose is to enhance and provide an absolutely safe and healthy workplace. ISO 45001 is designed to enable organizations, regardless of size or industry, in designing systems to proactively prevent injury and ill health.

The requirements are designed to be embedded in an organization's management and business processes.

Why Your Organization Needs It?

There are many reasons an organization may need safety measures.

- A strong occupational health and safety management system can help reduce injuries and illness in the workplace.

- May help avoid legal costs and may even reduce insurance costs.

- Create a positive corporate culture supportive of prevention of workplace injury and illness, as well as employee participation.

- Employees feel their needs and safety are being taken into account.

Importance Of ISO 45001 Certification

Organizations need to ensure they manage all their risks to survive and to thrive. OHS is a key aspect, which every business has to manage proactively.

Apart from the devastating impact on people, poor OHS management can have many negative effects on organizations, such as the loss of key employees, business interruption, claims, insurance premiums, regulatory action, reputational damage, loss of investors and, ultimately, the loss of business.

Benefits Of ISO 45001

ISO 45001 implements the Annex SL process and structure, making integration of multiple ISO management system standards easier, such as ISO 9001 Quality Management Systems and ISO 14001, Environmental Management Systems.

- Organizations will have a definite OH&S policy. organizations determine quantifiable, measurable OH&S objectives and strategies to reach OH&S targets.

- Organizations shall take into effect the needs and expectations of their employees with respect to OH&S.

- Determining potential OH&S hazards in advance, through identified risks and methods to eliminate them will reduce adverse incidents related to OH&S

- Organization will help reduce the burden on agencies providing health care by avoiding OH&S related problems.

- Organizations will help themselves by complying with regulations in line with ILO resolutions.

- Organizations will increase awareness on OH&S factors and forewarn their employees to avoid all associated risks.

- Organizations will be bound to take all necessary actions to avoid potential risks associated with OH&S.

Target Customers

ISO 45001 can be implemented across any sector of a working economy that enables human interaction and interfacing with one another, machines and the environment.
